

# DATA SCIENCE, BS

## Program Description

The Bachelor of Science degree in Data Science is an interdisciplinary program combining a core of Computer Science, Mathematics, and Statistics with concentrations in application fields such as Bioinformatics, Business Analytics, Chemistry Informatics, and health Informatics.

Graduates with a Bachelor of Science in Data Science work in government and public policy, marketing, advertising, and industrial and university research. Graduates will fill one of the nation's largest gaps between demand for job candidates and highly trained professionals.

## Program Learning Outcomes

Upon graduation, majors in Data Science will be equipped to:

- Identify problems that may be solved using data analysis;
- Collect, organize, and validate data relevant to the solution of a problem;
- Extract variables and their characteristics to construct approaches and models;
- Use models and approaches to identify patterns and results;
- Assess results and their limitations to evaluate the developed solutions;
- Present data, models, results, and analysis of solutions;
- Apply Ethical standards in all aspects of the use and analysis of data in their chosen concentration.
