

EMERGENCY MANAGEMENT, BS

Program Description

The Bachelor of Science in Emergency Management degree provides students with state-of-the-art knowledge and skills through an all-hazards curriculum emphasizing emergency management principles that apply across disciplines, industries and types of emergencies. The degree focuses on the knowledge and skills for public safety personnel to mitigate, prepare, respond to, and recover effectively from the effects of disasters in their community.

The design of the program spans multiple disciplines including Fire, EMS, criminal justice, and public administration. In addition, the program will expose the students to scenario based learning to enhance their core competencies to adapt to the ever changing world of emergency management. Preparing the individual for leadership positions within the public safety sector, the program also includes leadership and management skill development. This program is available to augment associates degrees or concentrations in any of the Fire, EMS, or Criminal justice programs into a bachelor's degree.

Program Learning Outcomes

Upon completion of the program, the students will be able to:

- Describe and apply the laws governing emergency management at the Local, State and Federal levels.
- List and describe the emergency management disaster phases and how risk analysis is used and fits into the process.
- Analyze and apply resource management techniques including response and recovery phases in disasters and communication needs during disaster events.
- Create and administer preparedness, mitigation, response, and recovery plans for natural disasters and man-made emergency events.
- Analyze potential emergency situations and compute risk analysis from the administrative perspective required to direct emergency services agencies including, budgeting, policy creation, human resource management, and incident command functions.
